

PRAKASH GUPTA

Computer Science & Engineering | Software Engineer / Full-Stack Developer

Chennai, Tamil Nadu, India | Email: prakashgupta.cse2025@citchennai.net | GitHub: github.com/PrakashGupta | LinkedIn: linkedin.com/in/prakash-gupta

PROFESSIONAL SUMMARY

Computer Science and Engineering student focused on software engineering, full-stack development, backend systems, databases, and machine learning. Hands-on experience building web applications and AI/ML projects using Java, Python, C++, JavaScript, Node.js, React, FastAPI, SQL, and modern development tools. Strong interest in designing reliable applications, solving algorithmic problems, and deploying practical software solutions.

TECHNICAL SKILLS

Languages	Java, Python, C++, JavaScript, SQL
Frontend	HTML, CSS, JavaScript, React
Backend	Node.js, Express.js, FastAPI, Flask, Django
Databases	MySQL, SQLite, JDBC, SQL
AI / ML	Scikit-learn, XGBoost, Pandas, NumPy, SMOTE, MLflow
Tools	Git, GitHub, VS Code, Docker, REST APIs
Core CS	Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems

EDUCATION

Chennai Institute of Technology, Chennai — B.E. Computer Science and Engineering (Expected Graduation: 2029)

PROJECTS

Resume Screening AI

Developed an AI-assisted resume screening application with a web frontend and Node.js backend. Designed the application to process candidate information, support automated screening workflows, and connect the application with a persistent database.

Cyber Threat Detection System

Built a cybersecurity-focused application combining a Java/Spring-style backend, machine learning components, and a web frontend. Worked with model training, prediction workflows, APIs, database integration, and project deployment structure.

Credit Card Fraud Detection with MLflow

Developed an imbalanced-classification pipeline using Python, Pandas, Scikit-learn, SMOTE, and XGBoost. Experimented with multiple models and used MLflow for experiment tracking. Prepared a FastAPI-based model-serving workflow.

AI Government Scheme Assistant

Designed an AI-powered application concept that collects user information, evaluates eligibility, ranks relevant government schemes, and presents benefits, required documents, and application information through a web interface.

Java JDBC Expense / Student Management Applications

Created console-based Java applications using OOP, JDBC, SQL, and database operations including insert, update, delete, search, and retrieval workflows.

RELEVANT COURSEWORK

Data Structures & Algorithms • Object-Oriented Programming • Database Management Systems • Computer Networks • Operating Systems • Machine Learning • Software Engineering

ACHIEVEMENTS & INTERESTS

- Regular practice of algorithmic problem solving and competitive-programming style questions.
- Interested in backend engineering, full-stack development, AI/ML, cloud deployment, and scalable software systems.
- Experience troubleshooting development environments, database connections, APIs, and deployment configurations.

CAREER OBJECTIVE

Seeking software engineering internships and entry-level opportunities where I can apply strong programming, problem-solving, backend, and AI/ML skills while contributing to real-world software products and continuing to grow as an engineer.
